It is your responsibility to determine if you could legally purchase Tokens in accordance with laws applicable to you.

In the event of any conflicts between English version of this Presentation and its translations, English version shall prevail.

The Problem

- > Cryptocurrencies are extremely volatile, which prevents them from being more commonly used for the purposes other than speculations
- > Lower volatility can be achieved by backing them with physical assets
- > Best asset class we know is Real Estate: Largest industry in the world, stable historical returns and high predictability
- > But Real Estate is capital intensive with high entry barriers. Smaller investors do not receive the same level of returns as do large corporations and cannot control their assets pulled in funds under third-party management
- > Global exposure to real estate collective schemes for smaller investors is limited as regulations most of the time prevent them from accessing such vehicles outside their country of residence

Real estate is a US\$200 trillion industry with over US\$750 billion of annual investments

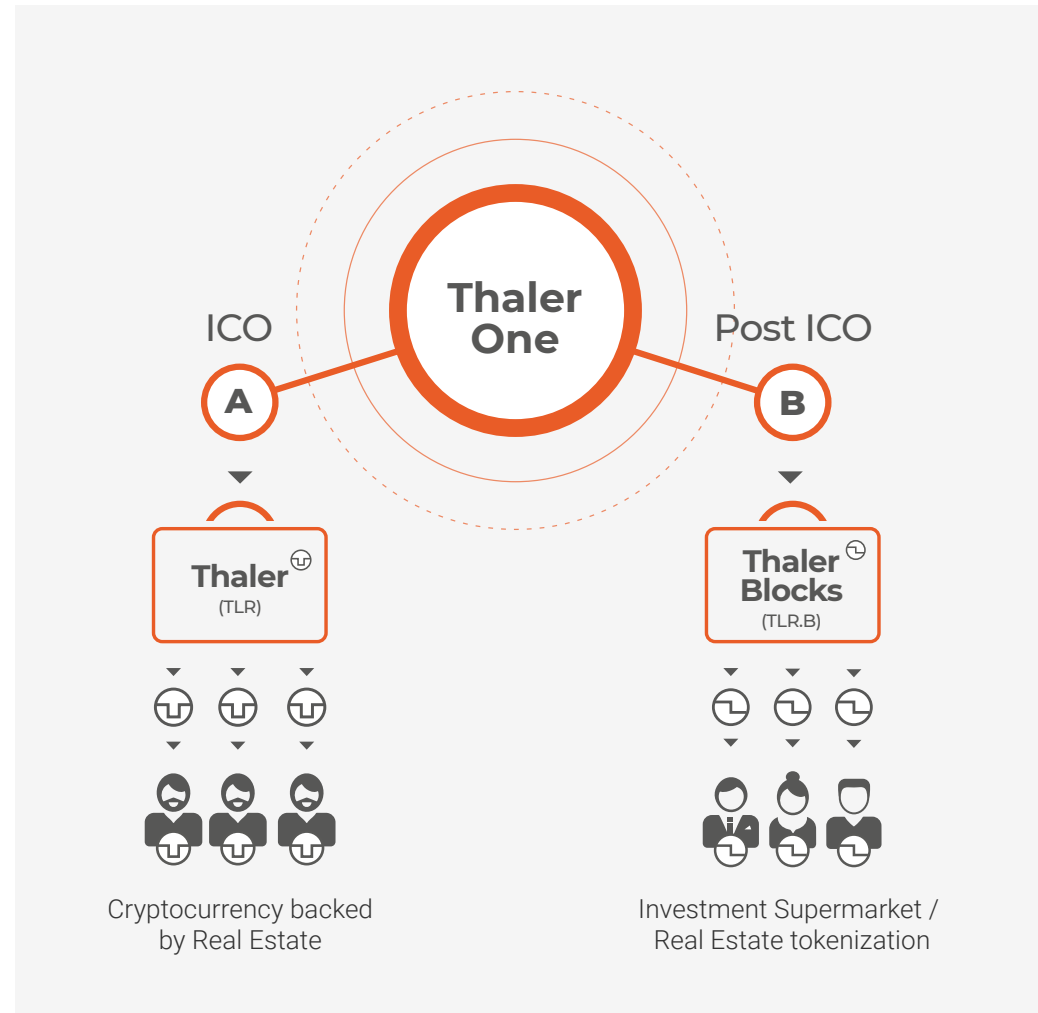

Lesser volatility than stocks or gold and historical returns at a level of 9% since 1980

Source: Bloomberg

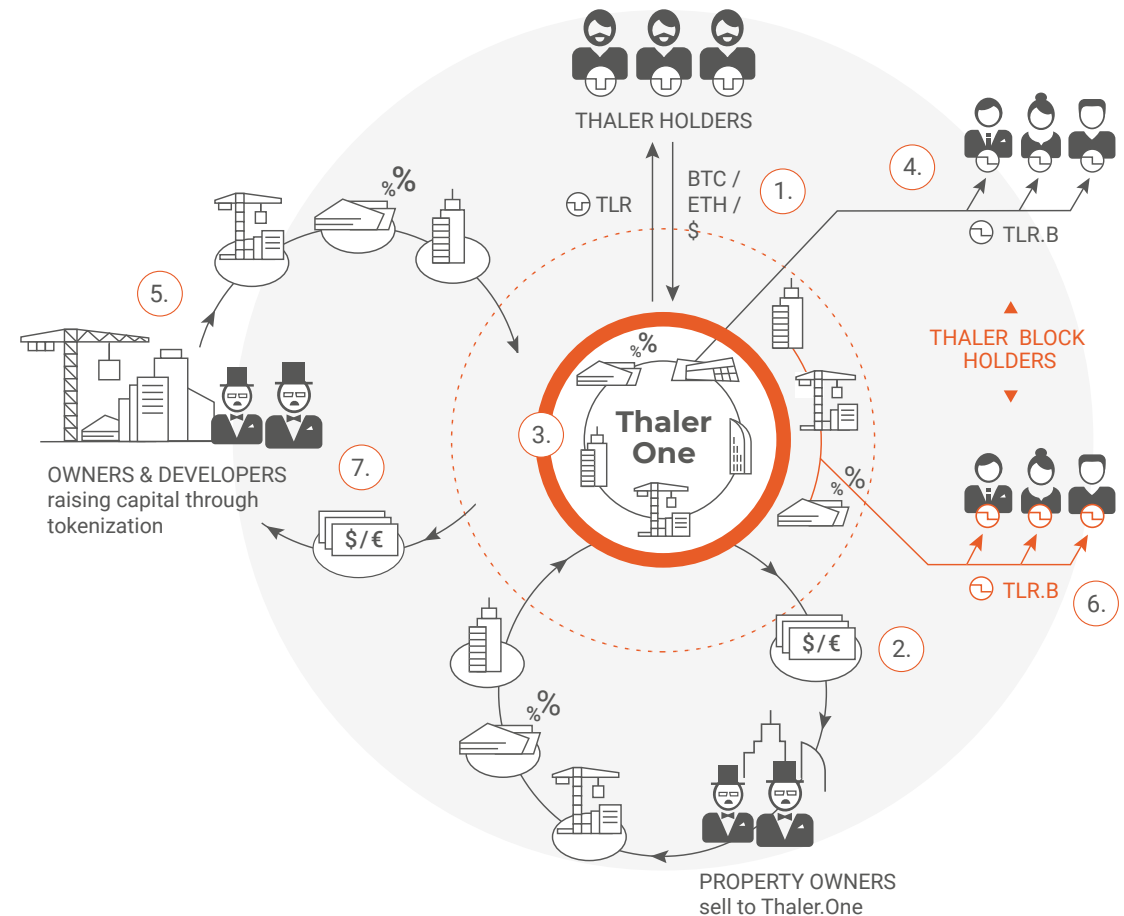

The Solution

- > Blockchain technology allows to create a cryptocurrency secured by real estate and provide crowdfunding opportunities for investments
- > We introduce Thaler.One – an Ethereum-based platform that combines traditional real estate investing with blockchain technology, all under professional management
- > Thaler.One is an investment vehicle, which includes a marketplace to buy, sell and raise capital, providing opportunities to invest in real estate directly with any budget
- > Thaler.One will issue tokens called 'Thaler' which will be backed by real estate and will provide its holders with current income from real estate and income from services offered through the Thaler.One marketplace

Thaler.One Platform in action

1. Investors participate in the tokensale's and receive Thaler tokens
2. Thaler.One uses tokensale's proceeds to purchase real estate assets
3. Real estate assets in the Thaler.One earn income
4. Some assets are resold with profit through tokenization to investors, holders of Thaler.Block tokens
5. Real estate owners who want to sell or raise capital contribute their assets to the Thaler.One
6. Thaler.One tokenizes them and resells to investors in exchange for Thaler.Block tokens
7. After Thaler.Block tokens are sold, real estate owners receive funds for their assets

Sources of revenue for Thaler token holders

- > Current returns from real estate: rental income, interest on loans and profits from sale
- > Profits from re-selling real estate assets individually in the form of Thaler.Block tokens
- > Commissions for tokenization of assets charged to third-parties who want to buy/sell/raise capital through the platform

Bauman Technical University and HSE

Blockchain platform architecture and development

Thaler.One was founded by real estate and finance professionals with significant experience in real estate, excellent reputation. Each member of the team possesses from 10 to 25 years in their field and the team's total amount of raised capital exceeds US\$10 billion.

Comparables

Real estate crowdfunding platforms gaining popularity and have shown a sharp increase in funds raised over the past couple of years

www.realtyshares.com

- > Established in 2013
- > US\$700 mln invested in > 1 000 projects. Distributed US\$130 mln in dividends
- > 120 000 registered users
- > Over US\$1 bn total value of financed assets

www.realtymogul.com

- > Established in 2012
- > US\$320 mln invested in c.400 projects up to date. Distributed US\$70 mln in dividends
- > 150 000 registered users
- > Over US\$1 bn total value of financed assets

CADRE

www.realtyshares.com

- > Established n 2014
- > Over US\$350 mln in raised capital
- > Over US\$1 bn under management
- > Among investors – Goldman Sachs, Andreessen Horowitz, Jack Ma, Ford Foundation

Pros

- > Professionally managed by teams with expertise in real estate
- > Act within U.S. legislation, full legal transparency
- > Opportunity to select individual assets and strategies
- > Low entry-ticket starting from US\$5 000

Cons

- > Invest in the U.S. and available to U.S. residents only
- > Lack liquidity (investor needs to wait until the end of the project)
- > Limited size of investment and limited diversification
- > High fees charged to investors and companies looking for capital

20+ REAL ESTATE RELATED PROJECTS IN BLOCKCHAIN WERE PRIMARILY UNSUCCESSFUL

- > Lack of real estate experience as evidenced by lack of well-defined investment strategies
- > Do not disclose legal set-up, likely raising funds not in compliance with laws in any jurisdiction
- > Concentrate on IT solutions digging deep into technical details often ignoring the idea's economic rationale
- > Charge high up-front fees, which go back to founders (e.g. 20-30% of tokens allocated to team; 20-100% of collected funds are 'project' related expenses)
- > Nevertheless, gained attention and managed to raise c. US\$50 mln (combined) of which US\$30 mln went into the largest 3 projects

THALER.ONE OFFERS THE BEST OF BOTH WORLDS COMBINING TRADITIONAL CROWDFUNDING WITH BLOCKCHAIN

- > Clear investment focus and transparent legal structure
- > Professional team and alliances with the industry's majors
- > The bulk of funds raised are directed to buy assets, thus creating tokens backed by tangible real estate
- > No geographic boundaries and no limits to invest
- > Lowest possible fees with help of blockchain due to shortening the line of middlemen
- > Opportunity to offer investment products in countries, where foreign investment is limited, namely China
